

SOLAR 2 PERSON GOLF CART

This solar golf cart is an excellent 2-seater cart with a comfortable ride that includes charge-as-you-go solar technology.

Battery

The vehicle comes standard with a 105Ah Lithium Phosphate battery upgradable to 150Ah. In addition, the 2P Golf Cart can be supplied with an Australian made Endurance battery providing much improved performance, longevity, with NO FIRE RISK.

Solar Charging

The golf cart is charged from a standard 240v/10A household power point as well as Star 8 "charge-as-you-go" roof top solar technology, supplying up to 20kms range from 6 hours of sunlight.

If the vehicle's average daily journey is less than that generated by solar, it will rarely need grid charging.

For a more rugged/off-road experience the standard 8" wheels can be upgraded to larger 10" or 12" aluminium rims with optional off-road or turf tyres.

The 2P Golf Cart can also come equipped with premium leather seats, a rear facing bag hold area, optional cooler, ball washer and sand bottle.

- ✓ 7" Screen and reverse camera
- ✓ Golf cart optional features
- ✓ Solar – estimated up to 33kms/day
- ✓ Choice of battery
